

TEROS NETWORK UPDATE – 02/27/2021

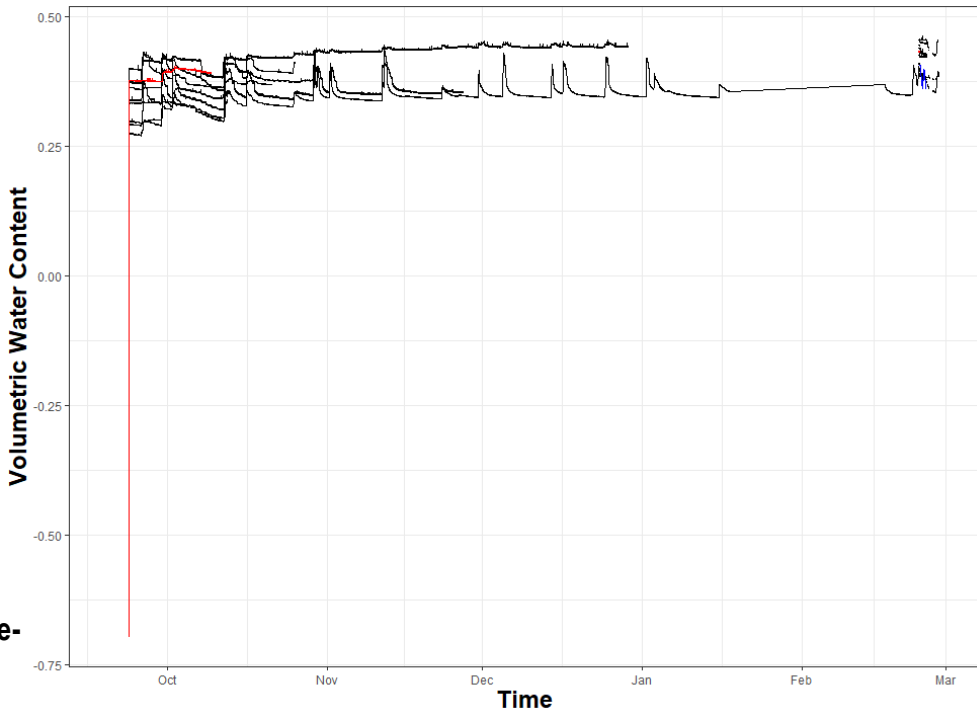

- Visualizing TEROs data from 09/2020 to present
- Documenting sensor-specific data gaps for records and to understand network failure cascade
- Data are shown per logger. Each logger covers one-third of a plot. Location highlighted in yellow
- 5 cm=blue; 15 cm=black; 30 cm=red
- Sensors not recording data as of 02/27/2021 are bold (2 in Control Plot, 5 in Freshwater Plot, 4 in Seawater Plot)

CONTROL PLOT –
NORTHWESTERN THIRD
(PNNL11)

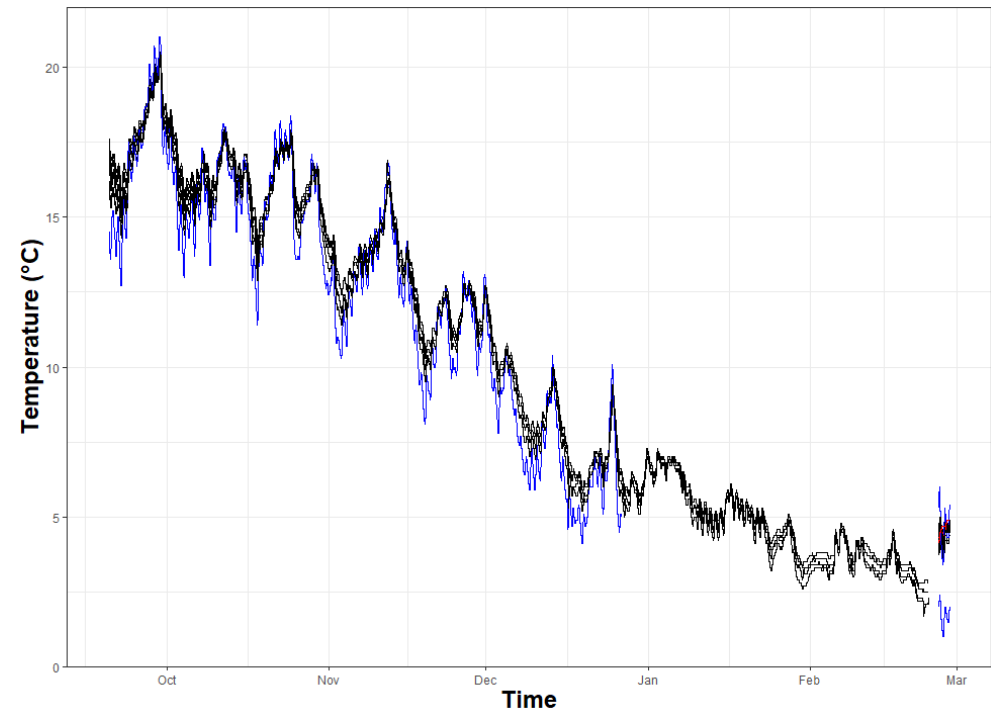

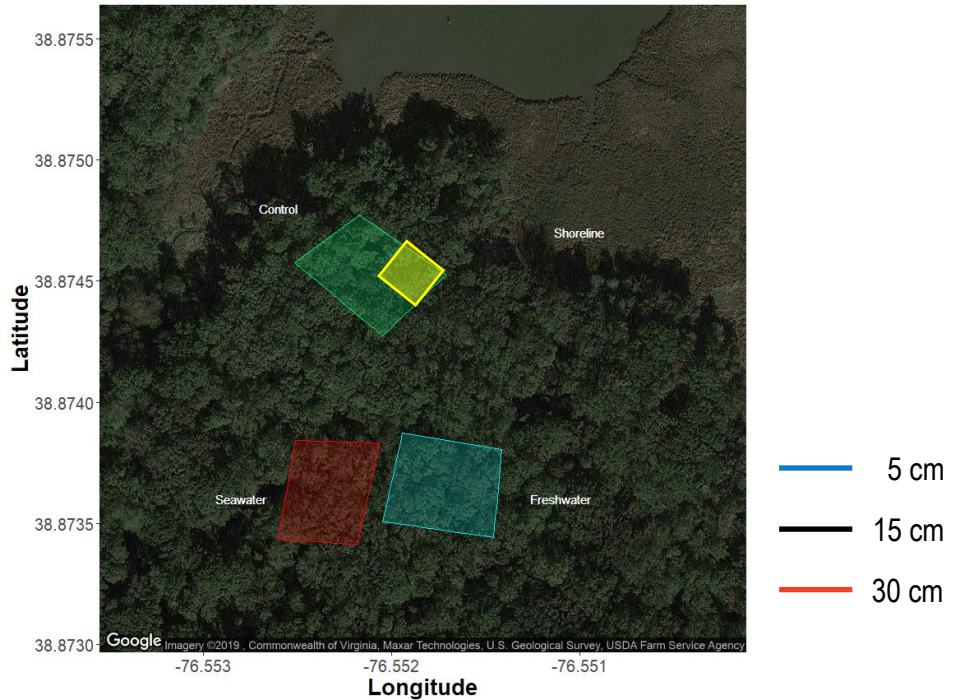

14 sensors:

- #no gaps; T135
- #gap from late October-present; T100
- #gap from October-February; T132
- #gap from late October-February; T160
- #gap from late November-present; T133
- #gap from late December-present; T019
- #no data until February; T056
- #no data until February; T129
- #gap from mid-October-February; T058
- **#no data; T059**
- #no data until February; T060
- #no data until February; 5cm; T138
- #gap from November-present; T055
- **#big jump sensor; 30 cm; gap from late-October-present; T101**

CONTROL PLOT –
NORTHEASTERN THIRD
(PNNL13)

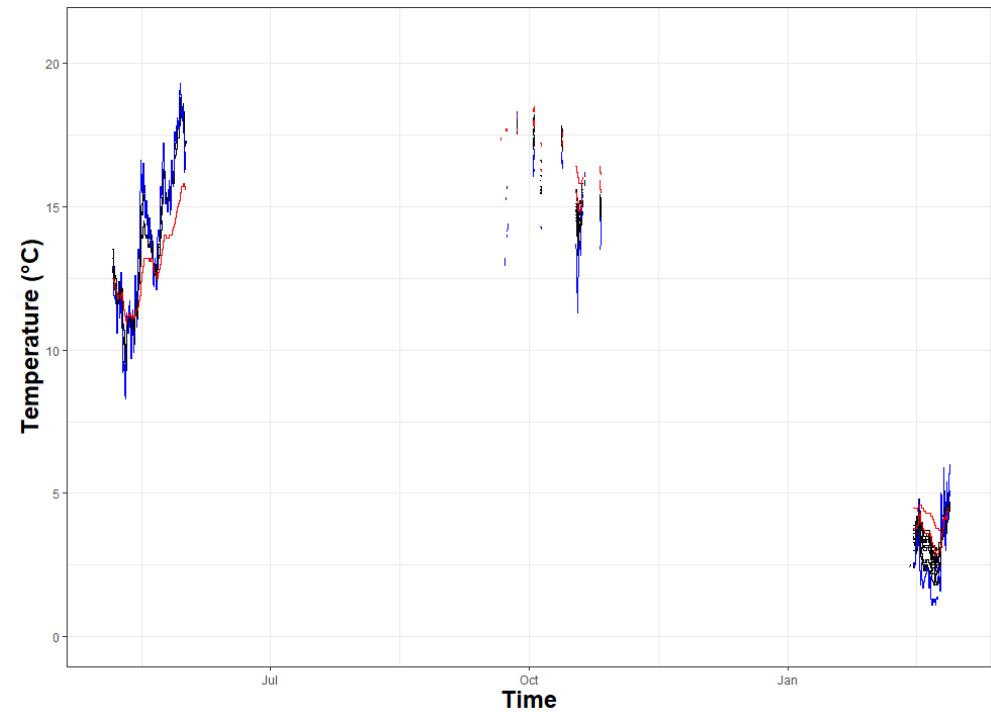

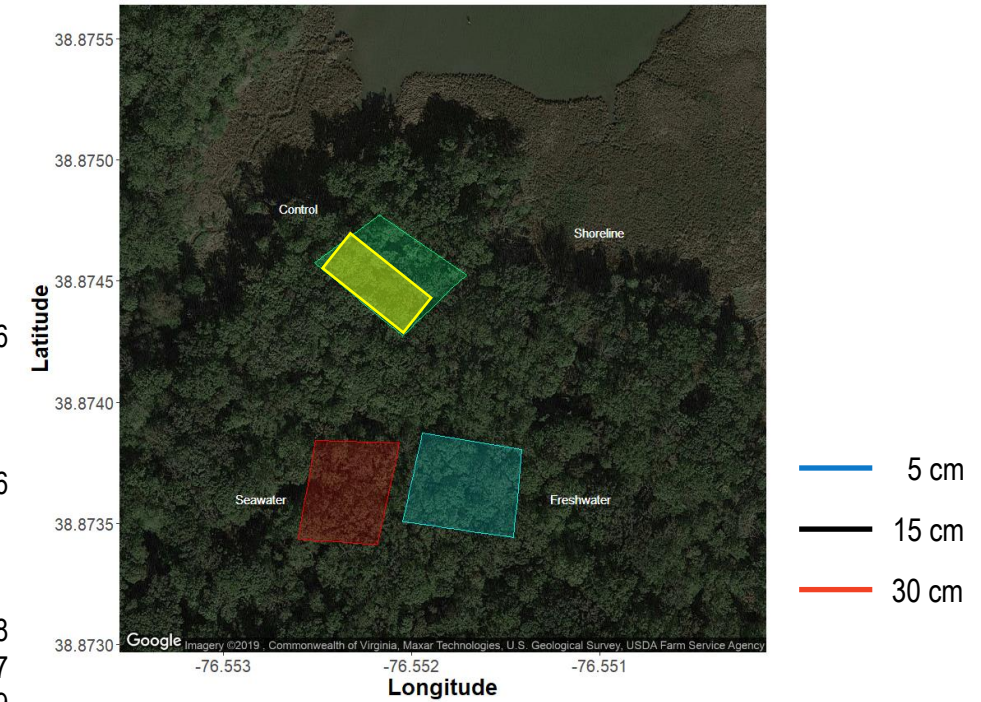

17 sensors:

- #maintenance gap in February; T099
- #no data until February; T113
- #gap from late-October-February; T137
- #gap from late September-February; T109
- #maintenance gap in February; T103
- #gap from late September-February; T104
- #no data until February; T033
- #gap from November-February; T057
- #maintenance gap in February; T035
- #no data until February; T110
- #gap from mid November-February; T111
- #gap from late December-February; T134
- #maintenance gap in February; T107
- #no data until February; T117
- #no data until February; T095
- #no data until February; T039
- #no data until February; T130

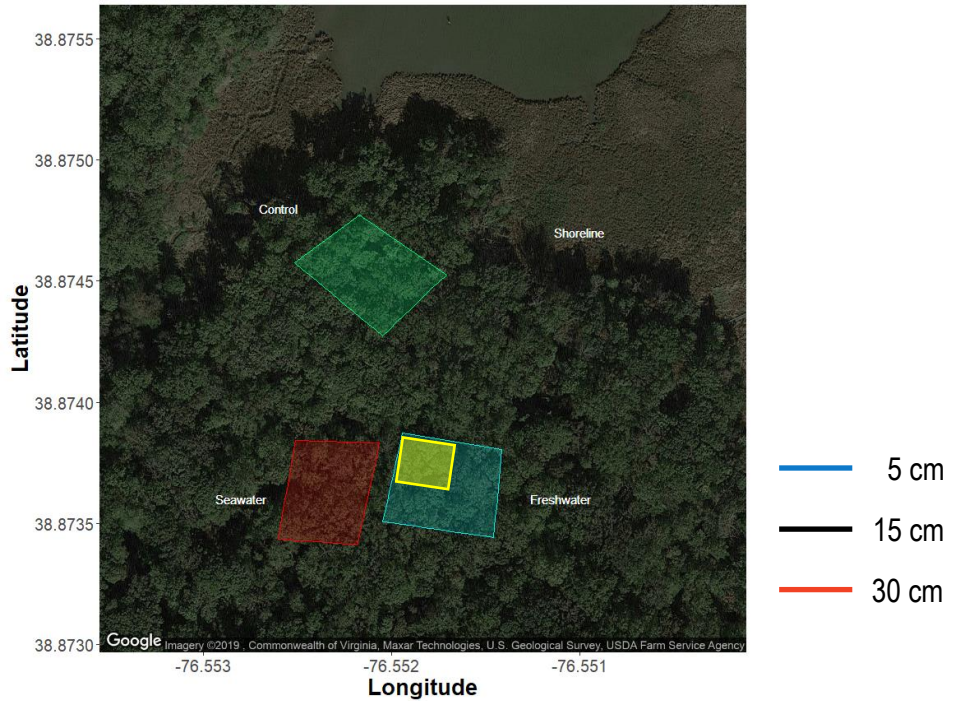

CONTROL PLOT – SOUTHERN THIRD (PNNL12)

- 15 sensors:
- #on in February; T112
 - #data for all chunks; on in February; T136
 - #on in February; T114
 - #on in February; T115
 - #on in February; T116
 - #data for all chunks; on in February; T036
 - #on in February; T037
 - #on in February; T074
 - #on in February; T062
 - #data for all chunks; on in February; T108
 - #data for all chunks; on in February; T097
 - #data for all chunks; on in February; T079
 - #on in February; T131
 - #on in February; T034
 - #on in February; T127

Why is there data for June? All data files pulled and processed in same way. Could not find summer dates in data frame.

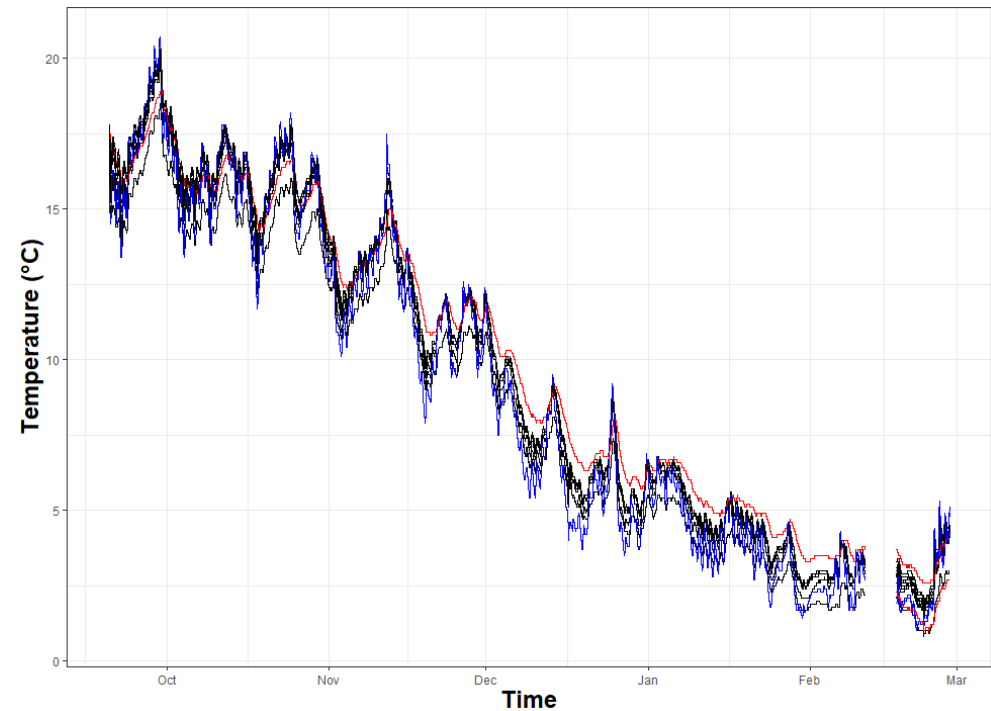

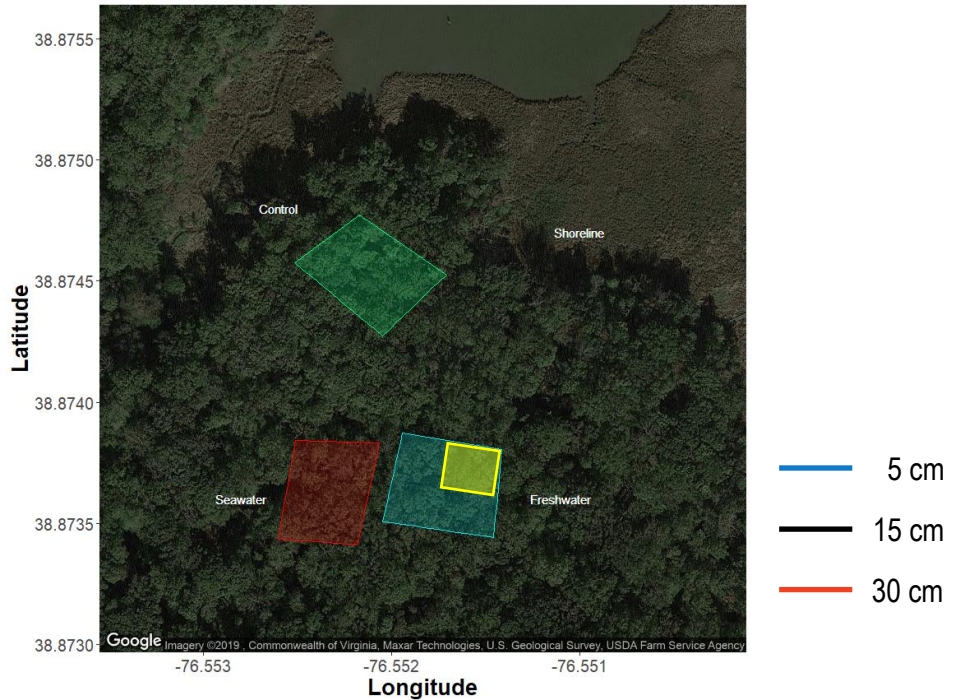

FRESHWATER PLOT – NORTHWESTERN THIRD (PNNL22)

- 14 sensors:
- #no data until February; T076
 - #no data until February; T077
 - #no data until February; T078
 - #no data until February; T053
 - **#no data; T080**
 - #no data until February; T081
 - **#no data; T082**
 - #no data until February; T083
 - #no data until February; T084
 - #no data until February; T085
 - #no data until February; T086
 - **#no data; T040**
 - #no data until February; T041
 - #no data until February; T042

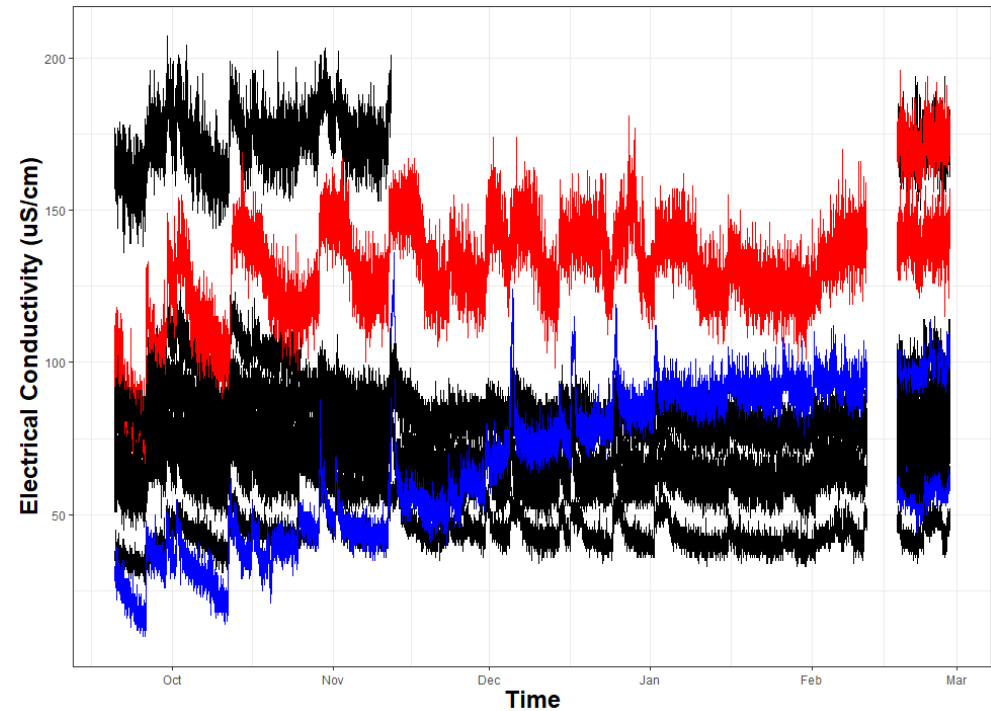

FRESHWATER PLOT –
NORTHEASTERN THIRD
(PNNL21)

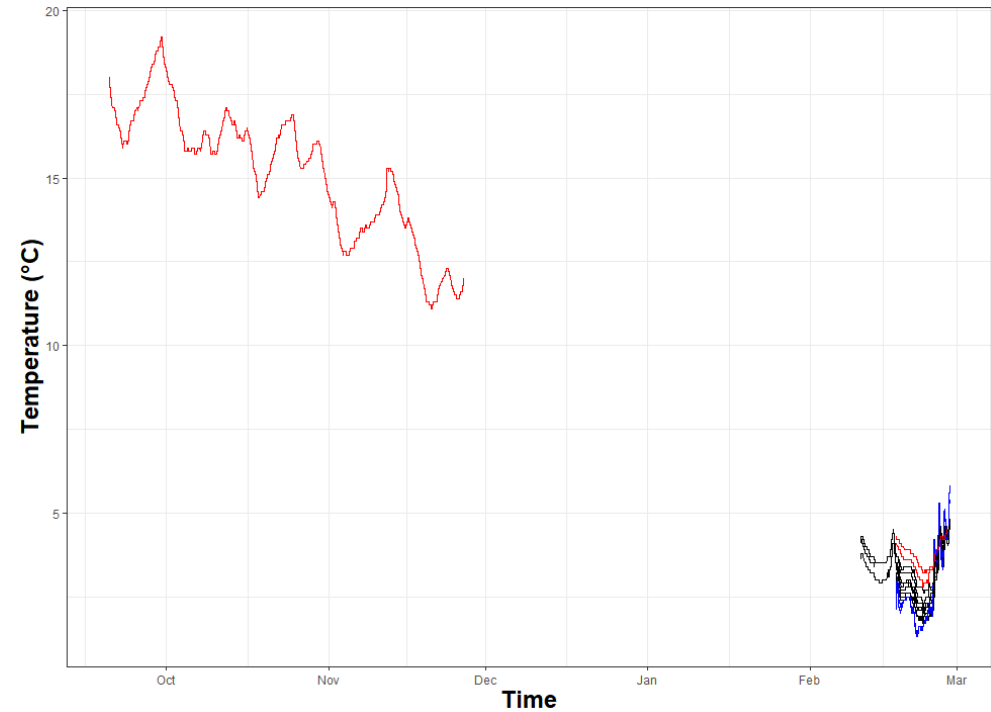

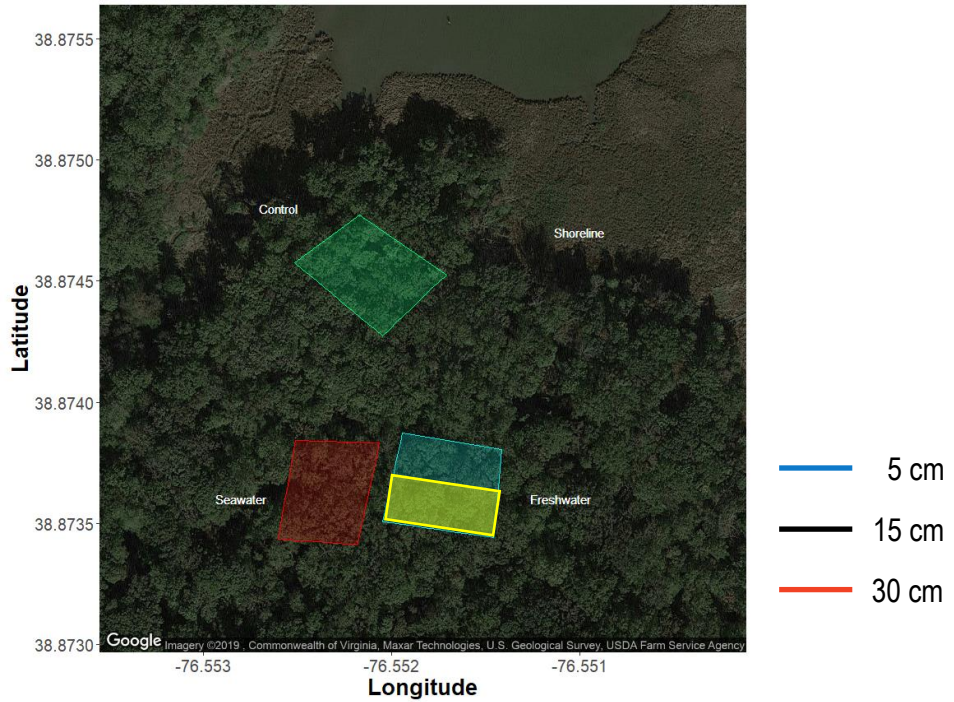

17 sensors:

- #gap from mid-November-February; T001
- #no data until February; T002
- #maintenance gap in February; T003
- **#gap from late October-present; T004**
- #maintenance gap in February; T005
- #maintenance gap in February; T006
- #gap from late October-February; T007
- #maintenance gap in February; T008
- #maintenance gap in February; T009
- #maintenance gap in February; T012
- #gap from late-November-February; T013
- #no data until February; T121
- #no data until February; T122
- #maintenance gap in February; T123
- #maintenance gap in February; T124
- #gap from late November-February; T125
- #no data until February; T126

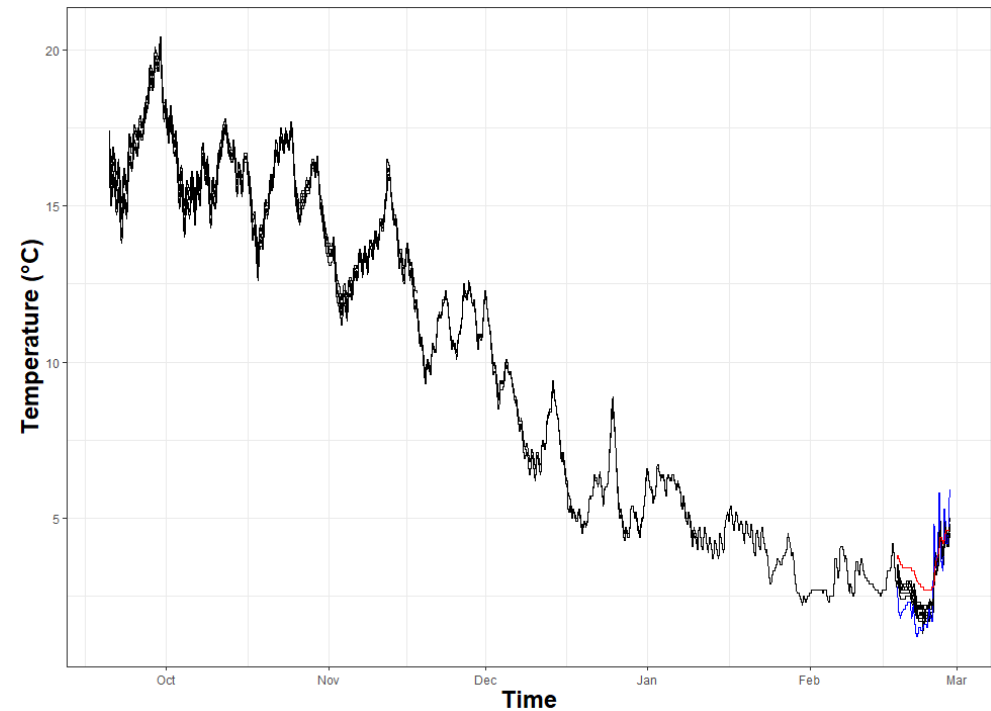

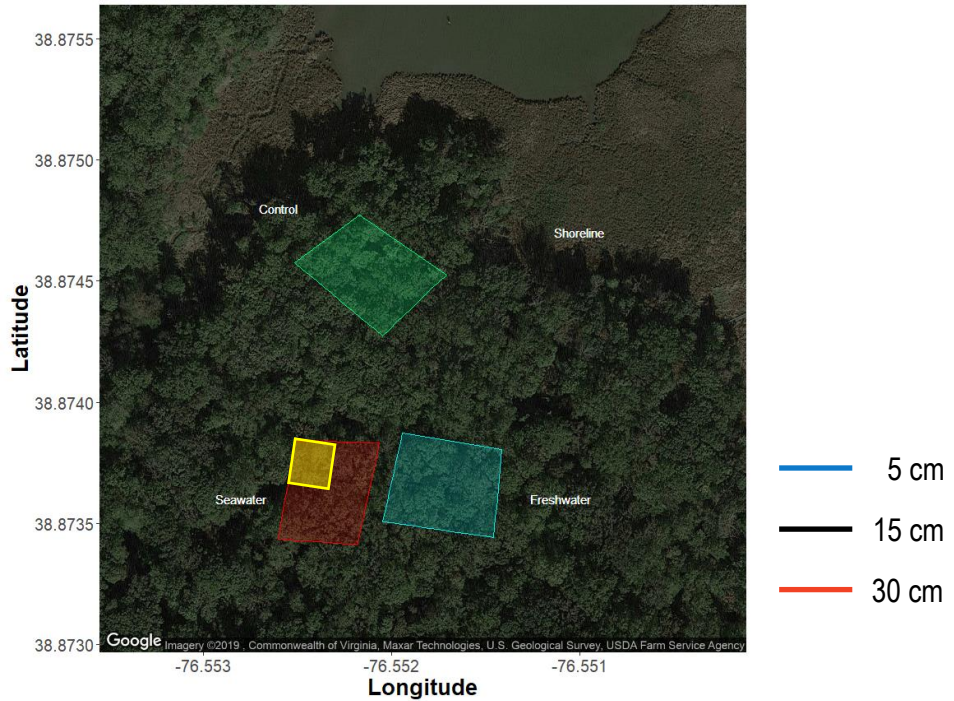

FRESHWATER PLOT –
SOUTHERN THIRD
(PNNL23)

- 15 sensors:
- #no data until February; T014
 - **#briefly on in February, then off; T015**
 - #no data until February; T016
 - #no data until February; T017
 - #no data until February; T018
 - #no data until February; T010
 - #no data until February; T011
 - #no data until February; T025
 - #no data until February; T026
 - #no data until February; T118
 - #no data until February; T119
 - #no data until February; T120
 - #no data until February; T043
 - #no data until February; T044
 - #gap from late December-February; T045

SEAWATER PLOT – NORTHWESTERN THIRD (PNNL31)

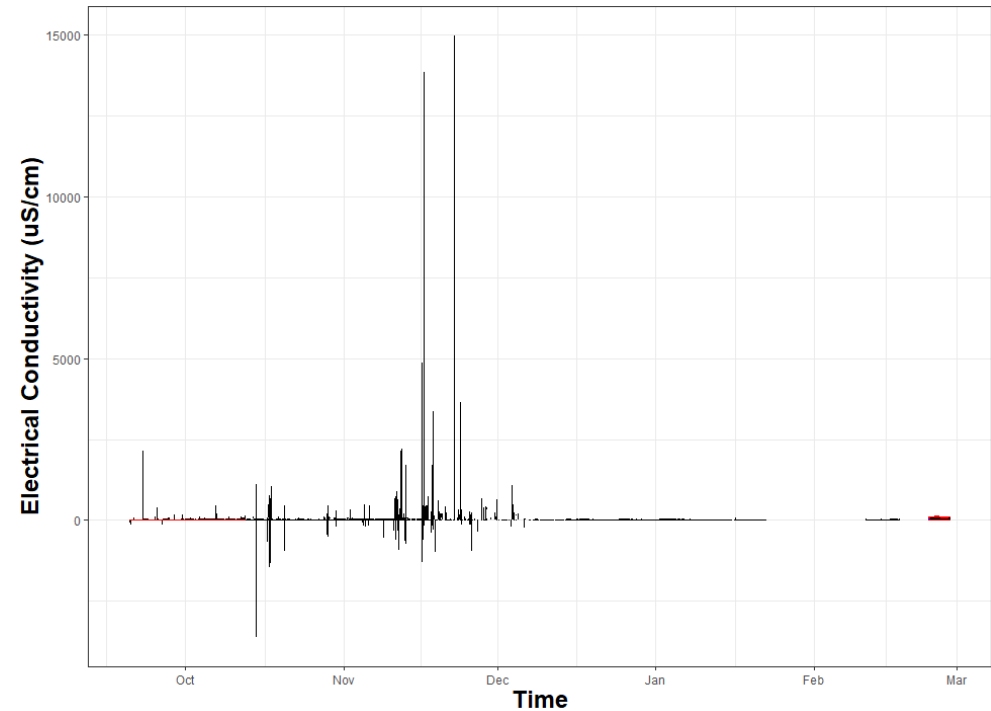

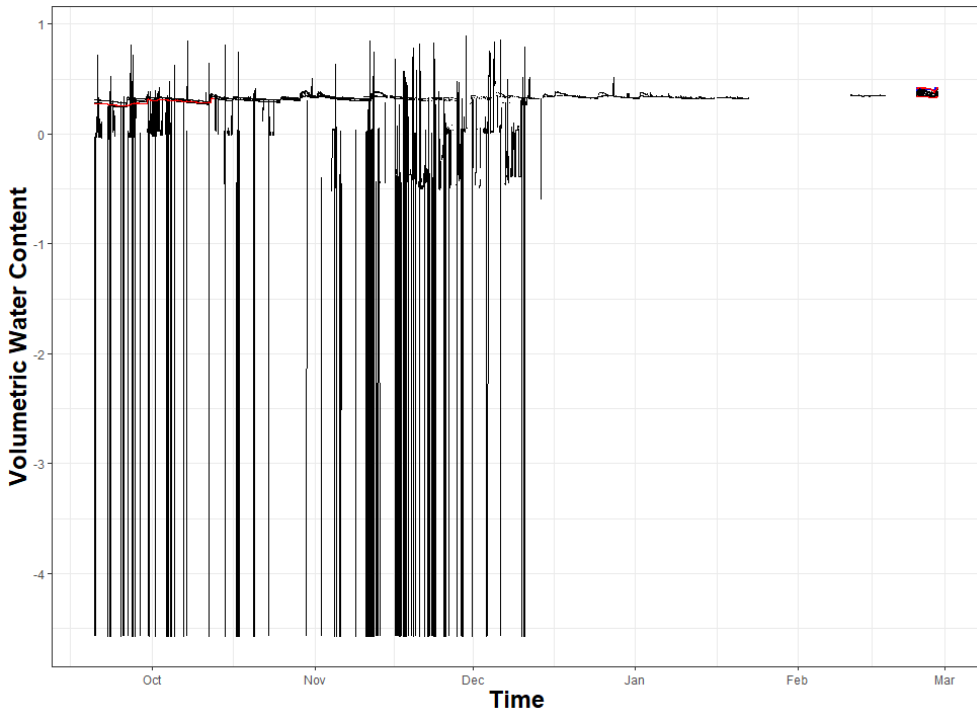

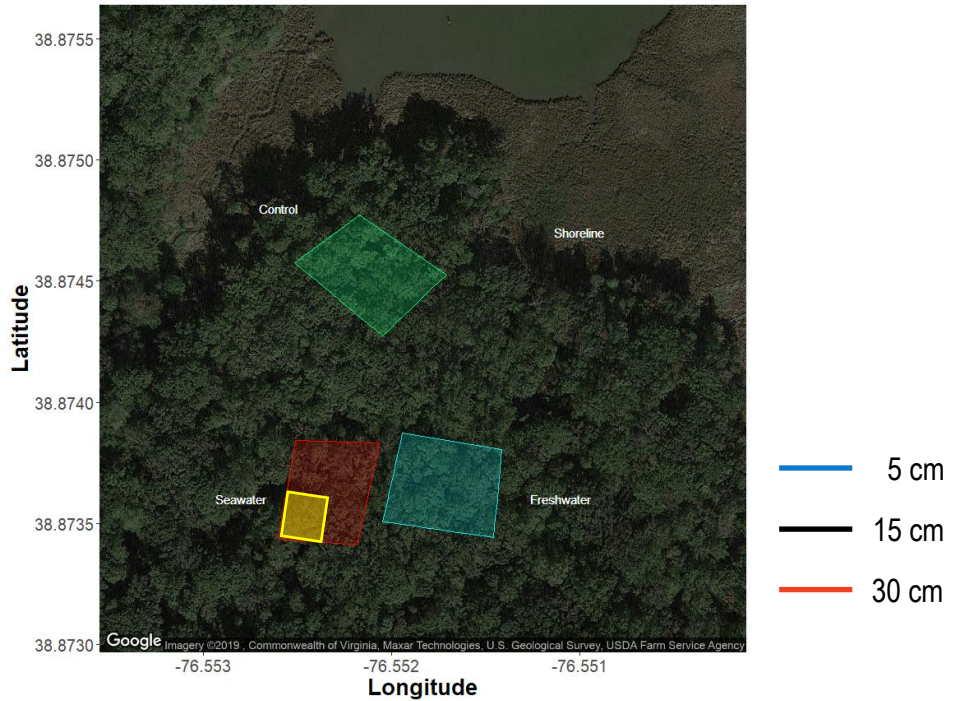

14 sensors:

- #no data until February; T027
- #no data until February; T028
- #gap from mid November-February; T029
- #maintenance gap in February; T030
- #gap from late October-February; T031
- #gap from mid December-February; T032
- #gag from late October-February; T020
- #gap from mid January-February; T021
- #gap from mid November-February; T022
- #no data until February; T023
- #no data until February; T024
- #no data until February; T089
- #no data until February; T090
- #no data until February; T091

SEAWATER PLOT – SOUTHWESTERN THIRD (PNNL33)

- 17 sensors:
- #gap from late January-February; T063
 - #on in February T064
 - #gap from mid November-February (no jumps); T065
 - #gap from mid November-February; T066
 - #no data until February; T067
 - #no data until February; T068
 - #no data until February; T069
 - #no data until February; T070
 - #no data until February; T071
 - #no data until February; T087
 - #gap from mid December-February (no jumps); T088
 - **#briefly on in February then off; T092**
 - #gap from mid January-February (no jumps); T093
 - #gap mid October-February (no jumps); T094
 - #no data until February; T046
 - #no data until February; T047
 - #no data until February; T048

What causes huge sensor jumps?

SEAWATER PLOT – WESTERN (N&S) THIRD (PNNL32)

- 15 sensors:
- #data for all chunks; on in February; T050
 - #data first two chunks; off in February; T051
 - #data for all chunks; on in February; T052
 - #data for all chunks; on in February; T102
 - #data for first two chunks; off in February; T054
 - #data for all chunks; on in February; T072
 - #data for all chunks; on in February; T073
 - #data for all chunks; on in February; T038
 - #data for first two chunks; briefly on in February, then off; T075
 - #data for first chunk; on in February; T105
 - #data for all chunks; on in February; T049
 - #data for all chunks; on in February; T098
 - #data for all chunks; on in February; T106
 - #data for all chunks; on in February; T096
 - #data for all chunks; on in February; T128
